

# About The Seminar

This seminar is intended for people who:

- are contemplating making the transition to digital;
- have recently made the transition to digital;
- are somewhat experienced with digital, but are still confused about some aspects; or
- just want to know more about digital photography

When making the transition from film to digital there is so much to learn that it is overwhelming. This seminar will provide an overview of digital technology and help you cut through the jargon.

# TOPICS

## Basics of Digital Photography.

In this four hour seminar you will learn about the following:

In this workshop we will cover the basics of:

- Understanding your Digital Camera
- Camera Features and Controls
- Camera Menus and Displays
- Camera settings
- Taking better photos
- Processing, Managing and Printing your images

### Note:

We will have a camera, laptop and printer set up to simulate an actual digital darkroom. During this time we will take several photos with the digital camera and process these images for all to see.

There will be a question and answer period also. **BRING YOUR CAMERA and instruction manual**
